Quick start & publication	3
Courts & base prices	4
Opening hours, prices & closures	5–7
Payment setup	8
Venue settings & booking rules	9–10
Dashboard & daily checks	11
Review payments & manage bookings	12–13
Open Play	14
Reports & fee statements	15
Troubleshooting & support	16

Sign in to your venue

First invitation or replacement link

1. Open the latest Plotline access email sent to the address you gave Plotline. Check the venue name, then open its account-setup link.
2. On **Set your password**, enter the same new password twice (at least eight characters). Select **Set password** to continue to the Dashboard.
3. Bookmark your venue's regular admin address, ending in **/admin/login**. Keep the invitation link private.

If you already have a working account

Open the regular admin sign-in link for the venue. Use your existing email and password. A draft venue can show **Staff sign in** before it shows the Dashboard.

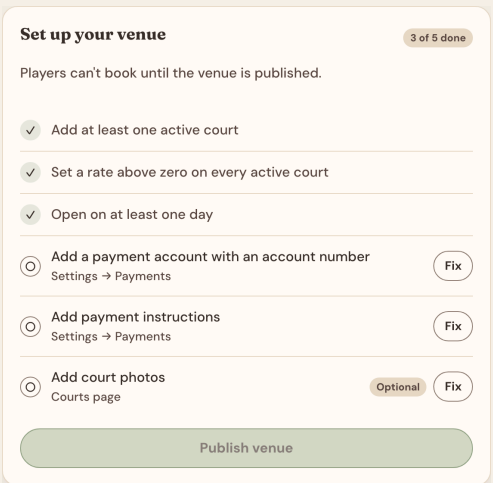

The draft-venue sign-in form. Use the email address that received access.

On a phone, use the menu at the top to open navigation. If you manage several venues, check the venue selector before changing anything.

Quick start to publication

On the draft venue's **Dashboard**, select **Fix** beside an unfinished item. Return here after each save.

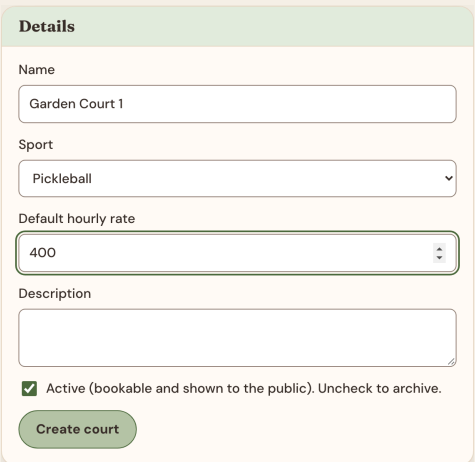

1. **Courts.** Create at least one active court. Set a default hourly rate above zero on every active court.
2. **Schedule → Opening hours.** Ensure an active court is open on at least one day.
3. **Settings → Payment Setup.** Add an account with a number and save written payment instructions. These count as two separate requirements.
4. When the counter reaches **5 of 5 done**, select **Publish venue**. Open **View public site** and check the court, times and price on the player booking page.

In this draft, the two payment items still block publication. Photos are optional and do not count toward the five.

Add a bookable court

1. Open **Courts → Add court**. Enter the name players will recognize, choose the sport and set the **Default hourly rate**. Add a description if helpful.
2. Leave **Active** checked and select **Create court**. The saved court opens so you can add photos. The first is its cover. Use **Make cover** to choose another.
3. Open the court from **Courts** to change its details. Select **Save changes**. Set special hourly prices under **Schedule → Prices**.

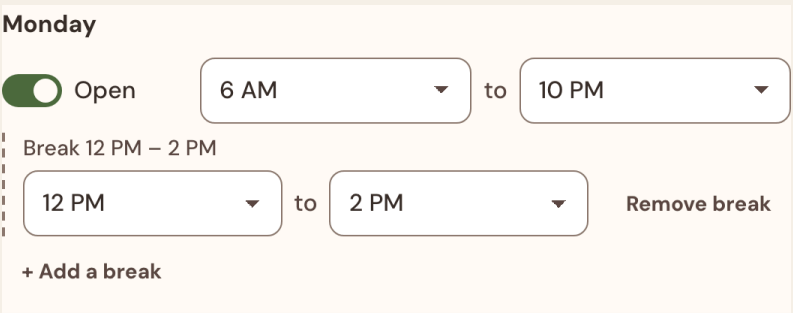

Example setup for one pickleball court. Enter your own hourly price.

> To retire a court with booking history, uncheck **Active** and save. Its bookings stay in your records. Deletion is available only for a court that has never been booked.

Set your weekly hours

1. Open **Schedule → Opening hours**. Switch each day to **Open** or **Closed**. For an open day, select opening and closing times in whole hours.
2. For a lunch or maintenance break, select **+ Add a break**. Choose both ends of the break. Add another if needed.
3. Use **Copy hours from** to select your source day, then choose a **Copy to** group. Check **Week at a glance** before saving.

The gap between the two break times is closed to new bookings.

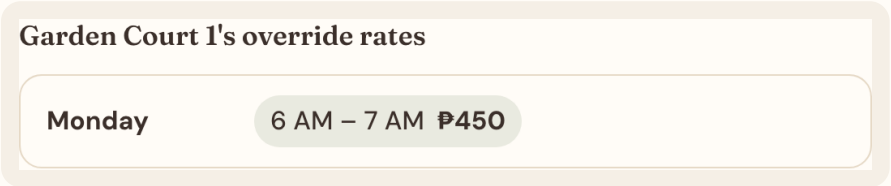

When one court keeps different hours

Under **Courts with different hours**, choose the court and select **Give this court different hours**. Check the "Editing … only" notice, then change its week. **Back to all courts** returns to the venue week.

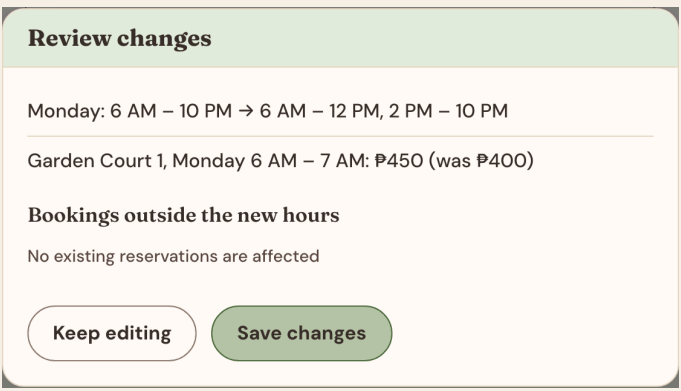

To restore the venue week, choose **Use opening hours** for that court and confirm. Finish with **Review & save** as described on the next page.

Set an override & save

In **Prices**, select the court, rate day, and start and end hours. Enter the hourly **Override price** and choose **Apply rate**. To restore the base price for a range, leave the price empty and apply it.

Hours and prices share one draft. Switch between the tabs to check either. Choose **Review & save** in the bottom bar to see the changes together.

Keep editing returns to the draft. Save changes commits both tabs.

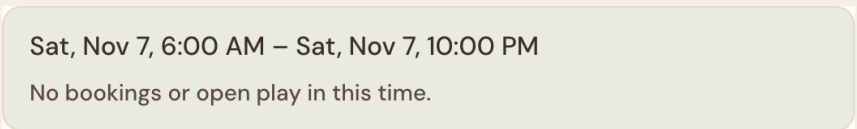

Check **Bookings outside the new hours**. The preview looks ahead 90 days. Follow up with affected players yourself. Existing reservations keep their time and price.

Choose **Save changes**. To abandon the whole draft, choose **Discard** in the bar and confirm.

Close courts for an event

Use **Schedule → Closures** for a one-off holiday, repair or private event. The weekly timetable is separate.

1. Select **Today**, **Tomorrow**, **This weekend** or **Pick dates**. For specific dates, set both ends.
2. Select **All courts** or one court. Use **All day** to cover the operating day, including hours after midnight. For a shorter closure, set start and end times.
3. Choose a reason or type your own. The reason is visible to staff. Check the summary and any bookings or open play already in that time.
4. Select **Add closure**. Check **Upcoming closures** for the dates added. For a multi-day request, check this list before retrying after an error.

Read the interval and booking check before adding the closure.

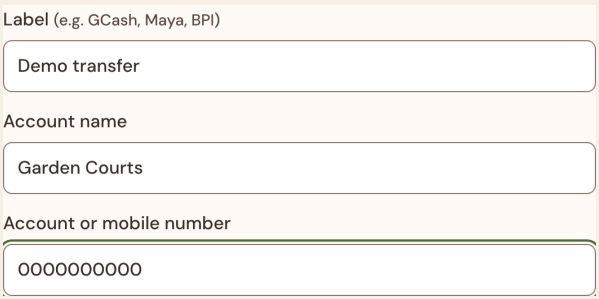

> Existing bookings and sessions stay booked. Arrange changes with players through Bookings or Open Play. To reopen a time, find its entry under **Upcoming closures**, choose **Remove** and confirm.

Tell players how to pay

Open **Settings → Payment Setup**. Complete both sections before returning to the Dashboard checklist.

1. Add the receiving account

Under **Add an account**, enter a label players know, the account name and the receiving number. Add a QR image if you use one. Select **Add account** and check the saved entry. Use **Edit** to correct it later.

Demo fields only. Enter the account your venue actually checks.

2. Save written instructions

In **Payment instructions**, tell players where to pay, what reference to include and how to upload proof. **Use example** fills the box so you can edit it. Select **Save instructions** and wait for confirmation.

> The account and instructions appear to players after they book. **Online payments** shows whether PayMongo is enabled for the venue. Contact Plotline about that setting.

Set up your public page

Venue Profile

Open **Settings → Venue Profile**. Set the venue name and select **Save venue profile**. Check the displayed timezone, currency and slot length. In the location section, enter the street address and paste your Google Maps link. Save the section and test the address link on the public page.

Add the city and any public contact or social links in their own sections. Publishing your booking site and appearing in Plotline's venue showcase are separate steps. Contact Plotline about a showcase listing.

Website Appearance

Choose a color preset and save it. Add your banner image, select the amenities you offer and add information players need before arrival. Set the sport order if you offer several sports. Save each section you change. Use **View public site** to inspect the result.

Policies & Waivers

Enter the waiver players must accept during online booking, then select **Save waiver**. **Reset to default** fills the editor with the default wording. Review it before saving. A blank saved waiver turns the requirement off.

> If you see an unsaved-changes prompt while leaving Settings, stay on the page and save the section you meant to change.

Choose your booking rules

Go to **Settings → Booking Rules**. Enter whole numbers in the units beside each field, then choose **Save booking rules**.

Booking window · 1 to 365 days

How far ahead an online player can reserve. A value of 30 allows bookings today and up to 30 days ahead.

Payment hold · 5 to 1,440 minutes

How long the player has to upload proof. If the hold expires first, the booking expires and the slot opens again.

Cancellation cutoff · 0 to 168 hours

How far before play a player must cancel online. With 24, the player needs to contact you inside the last 24 hours. With 0, they can cancel right up to the start.

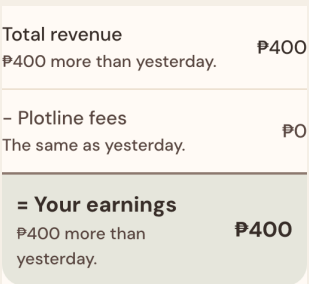

Proof rejections allowed · 1 to 10

Below this limit, a rejected proof gives the player a fresh payment hold to try again. At the limit, the booking is rejected and the time becomes available. With 1, the first rejection releases the slot.

> Choose a hold that gives players enough time to make a transfer and upload a receipt. Review the cutoff and rejection limit with the staff who answer booking questions.

Start the day on Dashboard

1. Check **Proofs to review**. Select **Review proofs** to open the queue. Use **Today's courts** and **Today's schedule** to check court times and booking references for the operating day.
2. Under **Earnings**, choose Today, This week, This month or a custom range. **Collected** shows money received. **Coming up** shows confirmed bookings still to be played.

This demo shows ₱400 collected and no fee recorded in the earnings split. Your figures depend on your bookings.

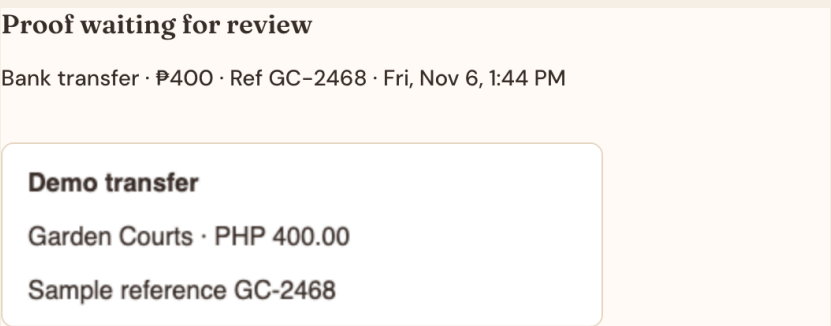

Use **Booked hours** to compare booked and available time. For several days, check the collected-per-day chart. Under **Export**, choose the bookings or payments CSV for the selected range. Include contact details only when the file needs them.

> For invoices and due dates, open **Reports**. For another copy of this guide, use **Download owner manual (PDF)** at the top of the Dashboard.

Review a payment

Open **Bookings**. The default **Needs review** filter shows submitted proofs. Select a row to open the details. On a phone, these appear below the list.

1. Match the booking reference, court, time and total. Under **Proof waiting for review**, inspect the receipt, amount, method and transfer reference. Check the money actually reached your receiving account.
2. If it matches, select **Approve and confirm**. The booking becomes confirmed and leaves the review queue.
3. If it does not match, enter a specific **Reason for rejecting**, then choose **Reject proof**. Tell the player what to fix. The booking rules on page 10 determine whether they get another attempt.

Sample receipt and reference. Match both to your own payment record.

An accepted online payment can confirm automatically. If you see **Refund due** or **Check duplicate**, reconcile the payment and arrange any refund outside the app.

Find or change a booking

Find a reservation

In **Bookings**, search by booking reference, customer name or email, then select **Search**. A full reference opens its booking. Search covers all bookings. Use **Clear search** to return to status, source and date filters.

Move a confirmed booking

1. Open a confirmed booking that has time left and select **Reschedule**. Where offered, pick the hour to move from. Earlier hours stay in their original place.
2. Choose the new date, a court of the same sport and a free start long enough for the move. Enter the reason the player should see.
3. Check the **Moving** and **To** summary, then select **Move booking**. Price and payment carry over. Note the new reference when moving only part of the booking.

Cancel a reservation

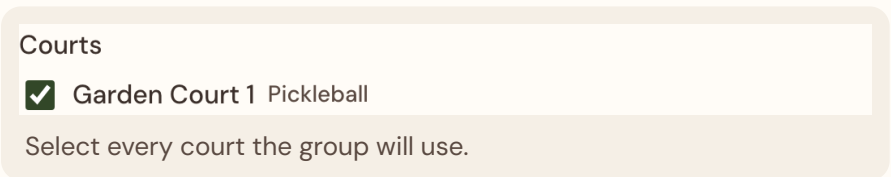

Open the active booking before it ends. Under **Cancel booking**, enter a reason, then select **Cancel booking**. The player sees the reason and the released time becomes bookable. Cancel any moved parts separately if needed.

> For a paid cancellation, arrange the player's refund outside the app. A fee credit in Reports concerns the venue's Plotline statement.

Run an open play session

Use **Open Play** to reserve one or more courts for a shared activity. Players can see the session and its details on the booking page.

1. Under **New session**, select the courts and date. Pick a start and duration within the available hours of all selected courts.
2. Add a title. Use **Details** for skill level, price or what to bring. For an external RSVP, enter a link label and its full HTTPS address.
3. Select **Add session**. Find it under **Upcoming sessions** and check the courts and times. Players cannot make ordinary bookings in those slots.

Change or remove a session

For a future session, choose **Edit**, update the form and select **Save changes**. To remove a session, choose **Delete** and confirm. Check the booking grid afterward. Opening hours, closures and other reservations still apply.

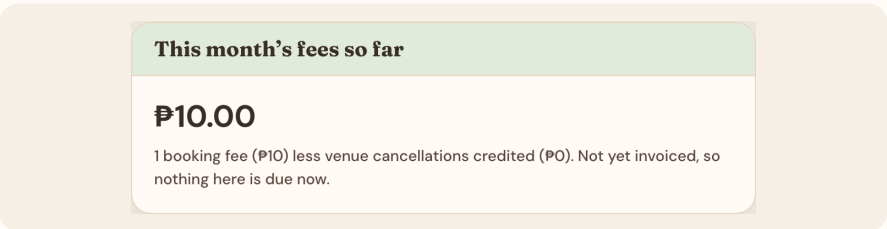

Read your fee statement

Open **Reports** to see the venue's **Statement**. The player pays the booking fee on top of the court price for a confirmed online booking. Walk-ins carry no booking fee.

What to pay now

Amount due totals issued, unpaid invoices. Check each due date and any **Overdue** label. Use the payment instructions from Plotline for that invoice. Contact support with the venue name and billing month if a payment is missing.

What is building up this month

This month's fees so far is a running total for the current month. It becomes payable when invoiced. A venue cancellation of a fee-bearing confirmed booking generates a credit.

Trace an amount

Select the **Month** to see its full totals and payment-method breakdown. In **Charges**, search a booking reference and follow it to the booking. Use the page controls for more rows. Under **Invoice history**, choose **Details** for fees, credits and total. Paid entries show the recorded payment details.

When something gets stuck

The access link expired or opens the wrong venue

Check the venue name and invited email. If you already set a password, try the regular admin sign-in. Otherwise ask Plotline for a fresh access link. Share the venue name and what you see. Keep passwords and private links to yourself.

Publish venue is unavailable

Return to the draft Dashboard and follow each **Fix**. Check every active court's base rate, a bookable day, an account number and saved payment instructions. Photos are optional.

A time or price looks wrong

Check the court is active, its weekly hours, breaks, individual hours, override price, closures and open play. Review and save the draft, then check the same date on the public booking page. If the schedule is unavailable for your venue, ask Plotline to check it. For a conflicting staff edit, note your intended changes, choose **Reload latest**, then reapply them.

Ask Plotline for help or a call

Include your venue, the screen you were on, any booking reference and the exact message. To arrange a call, tell us when you are available and your timezone.
